Fall 2024

Presentation 1 – Self-introduction

Introduce yourself (of course, in Japanese) using grammar constructions we have covered in class so far. Begin your presentation with a bow and follow other rituals of self-introduction in Japanese (read the chapter 1 of the textbook). Your self-introduction should last at least 15 seconds.

You will be asked to self-record your presentation using your computer or cellphone. Submit your presentation video to Blackboard by Sunday, October 6, 2024. You should consider submitting your presentation video or draft script to the lab session so that you can receive feedback from your tutor prior to the final submission of the video.

Your presentation will be graded based on the following points:

- (1) general fluency (e.g., pronunciation, naturalness, and tone of the language)
- (2) types of grammar constructions
- (3) gestures (e.g., bowing)

Oral presentation is very important part of your final grade. You are encouraged to practice during the tutoring hours or in my office hours.
